

Sherri Harrelson

M.E.T. Graduate

EdTech - Boise State University

Around the time I finished my degree, my husband and I separated. I had no idea how I would be able to support my two children and myself, as our situation literally changed overnight. I am happy to say that my degree, and more importantly my portfolio, landed what I consider a dream job!

I currently work at Lowe's Home Improvement, and I apply what I learned in my program every day! I began as an Instructional Designer almost two years ago, and I have since received a promotion. As a curriculum owner at a large corporation, I am responsible for ensuring that several thousand employees learn to do their jobs. This is certainly no small feat! Without BSU, I never could've accomplished this. By completing the program at BSU, I was able to prove my knowledge through the creation of my online portfolio, which ultimately landed this job. I'm so proud that I'm showing my children how to be successful while in a career that I love!

Sincerely,

Sherri Harrelson
